
REAL TIME - Information and Communication Technology Service Management

Duration: 4 Days Course Code: ITSM

Overview:

ICT Services that meet business, customer and user demands are Information Technology Infrastructure Library (ITIL) best practices for information and communication technology (ICT) Service management. The ITIL provides businesses with a customizable framework of best practices to achieve quality service and overcome difficulties associated with the growth of IT systems. ITIL has become a worldwide adopted framework for Information Technology Service Management (ITSM) within many public and private organizations. ITIL, the basis of BS1500 the British standard for IT service management has strong relationship with Quality systems such as ISO9000-2000 and a total quality framework such as European Foundation for Quality Management (EFQM) in Europe or (MBNQA) in North America. ITIL supports these quality systems by providing defined processes and best practice for the management of IT Services, enabling a fast track towards their Quality certifications. Your ICT organization is a Service Based one and there are numerous providers of high quality Service Management Software. Service Management Software is extremely convenient to use and your organization may wonder how it got along without it once it has begun to use it. Through this training program a real time different levels of Service Management Software Systems will be demonstrated.
